Reg: Donation to KidzCare for prosthetic arms for Farida Msanga

Dear Shikama Members and Donors to the Farida Fund,

On behalf of Farida and all at KidzCare we would like express our gratitude at the wonderful effort all of you made to contribute to this initiative. Your donations of 5,750 Euro was received with thanks. Each of you contributed to the miracles that unfolded in this young lady's life and we pray that you will all be truly blessed for your kindness

As you may know, Farida spent 3 and half weeks in Minneapolis, USA, where she was fitted with custom- made prosthetic arms. For both Farida, and Limb Lab, the company that helped build the prosthetics, this was an amazing challenge, as they had never encountered a client such as Farida. They had to figure out what would best suit her special needs, fit her with prototypes which were tweaked over the weeks, and she had to learn to express herself with what was comfortable, painful or helpful. I was very impressed by how well she could communicate and how brave she was, as some days were very taxing and tiring. However she soldiered on, and is now back at school and learning how to do different tasks with her new arms.

Your donation is designated entirely towards part of Farida's expenses,(we were able to raise contributions from other sources and Limb lab donated 75% of the treatment, physiotherapy and building of prosthetics) The remaining funds are kept in a special account designated. for any future adjustments or treatments Farida may need.

Kind regards and many thanks.

Mary Notman
Executive Director for KidzCare Tanzania
